EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with David Duckworth, Reg. No. 39,516 on June 4, 2009.

The application has been amended as follows:

Please amend claim 8:

[Claim 8] (Currently Amended) A method of insuring against satellite launch failure including rescue reservations comprising the steps of:

- purchasing a satellite for orbiting the earth;
- obtaining a launch insurance policy prior to launching the satellite from Earth, wherein the launch insurance policy including a rescue mission provision from a guarantor covering the launch of the satellite into an unintended orbit, the rescue mission provision providing for the payment to a rescue mission provider of a rescue mission in the event that the satellite is launched into an unintended orbit but otherwise remains functional, the rescue mission provision specifying that the rescue mission shall include 1) providing a extension spacecraft having guidance, navigation and control systems for position control of the extension

spacecraft and satellite combination and having an onboard propellant supply sufficient for moving the extension spacecraft and satellite combination from one orbit to another orbit, 2) launching the extension spacecraft into space, 3) mechanically connecting the extension spacecraft to the satellite launched into an unintended orbit, and 4) utilizing the extension spacecraft's guidance, navigation and control systems and onboard propellant supply to move the satellite from the unintended orbit to an intended operational orbit;

- triggering the rescue mission provision in the event that the satellite is launched into an unintended orbit but the satellite otherwise remains functional;
- calculating the rescue mission costs;
- paying a rescue mission provider for a rescue mission by the guarantor in accordance with the launch insurance policy; and
- initiating the rescue mission for moving the satellite from the unintended orbit to an intended operational orbit, comprising the additional steps of:
 - providing a extension spacecraft having guidance, navigation and control systems for position control of the extension spacecraft and satellite combination and having an onboard propellant supply sufficient for moving the extension spacecraft and satellite combination from one orbit to another orbit;
 - launching the extension spacecraft into space;
 - moving the extension spacecraft to within proximity of the satellite launched into an unintended orbit;

- mechanically connecting the extension spacecraft to the satellite launched into an unintended orbit; and
- utilizing the extension spacecraft's guidance, navigation and control systems and onboard propellant supply to move the satellite from the unintended orbit to an intended operational orbit.

Allowable Subject Matter

2. The following is an examiner's statement of reasons for allowance:

The closest prior art of record, Otis, Shapiro and Wallstreet do not teach or fairly suggest a method of providing satellite insurance including a rescue mission provision from a guarantor, providing for the payment to a rescue mission provider of a rescue mission in the event that the satellite is launched into an unintended orbit but otherwise remains functional.

In particular, the prior art does not disclose: calculating the cost of the rescue mission; paying a rescue mission provider for a rescue mission by the guarantor in accordance with the launch insurance policy; and initiating the actual rescue mission through the additional steps of providing the extension spacecraft and mechanically placing the satellite into the desired orbit.

An additional reference, Fleeter et al (US 6,550,720) discloses moving a satellite into a different orbit, but does not disclose the indemnification process associated with satellite retrieval.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
